

# Aussie Résumés™

career services that WIN jobs

## Job Performance Wheel

10: Highest Satisfaction ← → 1: Lowest Satisfaction

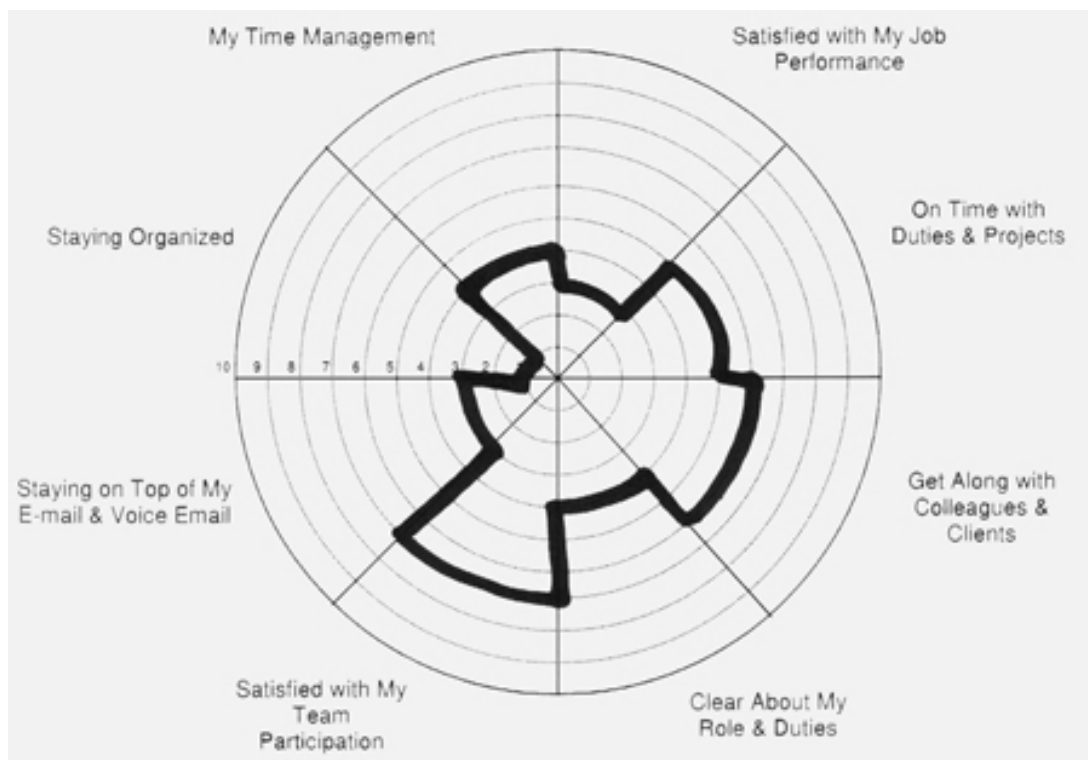

**Directions:** Score your sense of satisfaction with the aspects of your job performance labelled above. You may replace any of the labels with labels you believe are more appropriate for you. Use a scale of 0 to 10 to assess your performance and identify any areas you wish to improve. Then determine what actions you will take to improve your scores. An example is provided on the next page.

## Job Performance Wheel ~ Example

By plotting your satisfaction on your wheel, you can readily see where you are out of sync, or out of balance in your job / career, then take steps to improve your satisfaction levels in specific areas.

You can take this one step further by breaking the 8 sections into specific duties and / or projects to identify what aspects of your career or job you are not satisfied with. You will start to see an emerging pattern of what matters to you most and what you would like to move away from.

Can you imagine what would happen if you purchased a tyre that looked like your Wheel and tried to drive your car? It would be a pretty bumpy ride!
